PRESSEMITTEILUNG/ PRESS RELEASE

Advanced Engineering UK 2016 - Farmingtons Automotive GmbH draws positive balance

Georgsmarienhütte, November 2016

For the first time in the company's history, Farmingtons Automotive GmbH presented itself at this year's Trade show „Advanced Engineering UK“ from 02. to 03. November 2016 at the NEC in Birmingham. The focus was set on communicating the Companies core competences Engineering, Prototyping, Toolmaking and Serial production. The informations were brought to interested show visitors via film and print on individual information pillars.

The concept was rounded off by removable exhibits, which supported numerous discussions about production and further processing possibilities within the serial production and also gave the extra look and feel.

Promising new contacts from the entire European region as well as initial inquiries leave a positive overall balance. We would like to thank you for your visit and look forward to seeing you again next year.
