

PRESS RELEASE

Eurosatory 2016 – WELP Armouring

Paris, 13.06.2016 – 17.06.2016

The exhibition appearance of WELP Armouring at the Eurosatory 2016 which took place in Paris between the 13th and 17th of June 2016, has been a total success.

Our presentation of the new F2-TLC700 based on the Toyota Land Cruiser 200 (model year 2016) and our latest developments generated an enthusiastic response among the trade professionals. The F2-TLC700 produced by WELP Armouring will soon be available in the certified ballistic level VPAM VR7/BRV2009 and VR9/BRV2009 according to the German Beschussamt testing and approval.

Another highlight has been the presentation of our latest developments such as the quick-opening emergency roof exit. Our engineers have specially designed this emergency exit for special operation units, aid organizations and administrative bodies.

Also the presentation of our brand-new ballistic certification film of the F62-NPC700 based on the Nissan Patrol Y62 illustrated yet again our emphasis on security and consequently WELP Armouring's quality standards.

We thank you once again for enabling us to establish contact with a considerable number of interested parties.

Summary of the Eurosatory 2016

- **more than 2.500 trade visitors at our stand**
- **many delegations and high ranking officers are interested in our products**
- **successful presentation of the newest products and developments of WELP Armouring**
